**NOTE:** Under the new WA Phosphorus regulation (effective January 2013), P level has to be 2% or below and N:P ratio must be minimum 5:1. Hence the new packaging printed is modified to comply WA analysis.

## DIRECTIONS FOR USE

Dissolve 5g (1 level measure of enclosed spoon) in 5 litres of water to make 5 litres of liquid fertiliser. Apply weekly over foliage and surrounding roots. Apply enough solution to saturate the soil around the plant. Solution can also be used for foliar spray.

For young and sensitive plants use half strength solution of the above dilution.
