## DIRECTIONS FOR USE

Dissolve at the rate of 10 -15 grams (2 - 3 heaped measures of enclosed spoon) in 5 litres of water and apply enough solution to saturate soil or potting mix surrounding the plants. Repeat applications every 1 -2 weeks. For best results we recommend changing to Manutec Orchid Food when spikes are finished. The higher level of Nitrogen will further assist healthy foliage growth.

Notes for foliar spraying: use above dilutions for foliar spray. Avoid spraying during hot weather, windy and rainy conditions. Spray during early morning or late afternoon hours when temperature is mild.
