Nitrogen to Phosphorus (N:P) ratio 6:1

NOTE: Under the new WA Phosphorus regulation (effective January 2013), P level has to be 2% or below and N:P ratio must be minimum 5:1. Hence the new packaging printed is modified to comply WA analysis.

DIRECTIONS FOR USE

Dissolve 5g (1 heaped measure of enclosed spoon) in 5 litres of water to make 5 litres of liquid fertiliser. Apply weekly over foliage and the soil surrounding roots. Apply enough solution to saturate the soil or growing media. Solution can also be used as foliar spray. For young and sensitive plants use half strength solution at above dilution.

During high growth period (after dormant winter period) dosage can be increased to 10-15 grams (2-3 spoon measures) per 5 litres of water. Repeat applications weekly.
