

**Available in:**

500g boxes - 6 per carton  
Code: MTO5011  
Barcode: 931246277072

600g boxes - 8 per carton  
Code: MTO6011  
Barcode: 9312462601116

**PRODUCT FEATURES**

Developed to maintain safe nutrient levels that are suitable for producing Pink Hydrangeas. Stimulating root growth, beautiful foliage and the number of flowers on each spike. Vitamin B1/Fulvic and Amino acids have been added to enhance nutrient uptake and increase plant energy.

**ANALYSIS**

**ANALYSIS**

	WA ANALYSIS %W/W	ORIGINAL ANALYSIS %W/W
Nitrogen (N) as Nitrate	1.00 %	6.00 %
Nitrogen (N) as Ammonium	7.00 %	0.00 %
Nitrogen (N) as Urea	13.0 %	14.00 %
<b>TOTAL NITROGEN (N)</b>	<b>21.00 %</b>	<b>20.00 %</b>
Phosphorus (P) as water soluble	3.00 %	4.50 %
<b>TOTAL PHOSPHORUS (P)</b>	<b>3.00 %</b>	<b>4.50 %</b>
Potassium (K) as Nitrate	3.70 %	9.00 %
Potassium (K) as Carbonate	8.30 %	0.00 %
<b>TOTAL POTASSIUM (K)</b>	<b>12.00 %</b>	<b>9.00 %</b>
Sulphur (S) as Sulphates	6.00 %	0.26 %
Magnesium (Mg) as Sulphate	0.15 %	0.12 %
Iron (Fe) as Sulphate	0.10 %	0.10 %
Manganese (Mn) as Sulphate	0.05 %	0.05 %
Zinc (Zn) as Sulphate	0.01 %	0.02 %
Copper (Cu) as Sulphate	0.01 %	0.02 %
Boron (B) as Sodium Borate	0.005 %	0.005 %
Molybdenum (MoO as Sodium Molybdate	0.001 %	0.001 %

**Nitrogen to Phosphorus (N:P) ratio 7:1**

**NOTE:** Under the new WA Phosphorus regulation (effective January 2013), P level has to be 2% or below and N:P ratio must be minimum 5:1. Hence the new packaging printed is modified to comply WA analysis.

**DIRECTIONS FOR USE**

**Watering Can / Foliar Spray:**

1. Dissolve 20g (4 measures of enclosed spoon) of PART 1 (Fertiliser Pink Powder) to each 5 litres of water.
2. Add 20g (4 measures of enclosed spoon) of PART 2 (Calcium Nitrate - Clear Crystals) to each 5 litres of solution.
3. Apply each 5 litres of solution over 5 square metres, or to the soil surrounding four full size hydrangeas.
4. Applications must commence soon after winter pruning. Repeat applications, every 2 weeks, until flowering is finished. Best results are achieved by applying every 2 weeks, all year round.

**NOTE:** As the soil pH determines sepal colour, it is most important that the pH of the soil or potting media is determined and adjusted prior to growing period. Any pH between 5.5 and 6.0 is acceptable during plant growth, but when forcing begins the pH for a crop of pink sepals must be 6.0 or higher. pH can be increased by adding lime to the media and maintained by regular use of this solution.
