

PRODUCT FEATURES

A specific fertiliser developed for greater yield and more flavour, with enriched Calcium + Chelated Trace Elements. Also suitable for Cucumbers, Melons, Capsicums & Eggplants.

ANALYSIS

ANALYSIS	%W/W
Nitrogen (N) as Nitrate	10.00 %
Nitrogen (N) as Urea	2.50 %
TOTAL NITROGEN (N)	12.50 %
TOTAL PHOSPHORUS (P) as water soluble	2.50 %
TOTAL POTASSIUM (K) as water soluble	28.00 %
Calcium (Ca) as Nitrate	0.70 %
Calcium (Ca) as Phosphate	0.30 %
TOTAL CALCIUM (Ca)	1.00 %
Sulphur (S) as Sulphates	0.30 %
Magnesium (Mg) as Sulphate	0.50 %
Manganese (Mn) as EDTA Chelate	0.05 %
Zinc (Zn) as EDTA Chelate	0.01 %
Copper (Cu) EDTA Chelate	0.01 %
Boron (B) as Sodium Borate	0.10 %
Molybdenum (Mo) as Sodium Molybdate	0.002 %
Nitrogen to Phosphorus (N:P) ratio 5:1	

Available in:

1 kg boxes - 6 per carton

Code: MTO6713

Barcode: 9312462100015

DIRECTIONS FOR USE

Applying by normal watering method (i.e. Watering Can)

For Young Plants: Prepare half strength solution by dissolving 5 grams (1 heaped measure of enclosed spoon) in 10 litres of water. Apply enough of this solution to saturate the soil or potting mix surrounding the plant. Repeat the application once a week.

For Matured Plants: Prepare full strength solution by dissolving 5 grams (1 heaped measure of enclosed spoon) in 5 litres of water. Apply enough of this solution to saturate the soil or potting mix surrounding the plant. Repeat the application once a week.

Note: Avoid applying immediately after transplanting seedlings, allow up to a week to settle down & establish in the ground.

Hydroponics / Drip Irrigation / Foliar Spray

Use half strength solution (i.e. 5 grams in 10 litres of water) when plants are young, change to full strength solution (i.e. 5 grams in 5 litres of water) as they mature.

NOTE: Spraying thoroughly by wetting both sides of the foliage improves growth & fruit set. Always spray in cool & mild weather conditions, *never* in hot and humid conditions.
